Comp Photography (Sp 2015) HW 1

Irfan Essa

Celebration

Details of the Picture

- A Caption:
  - "Celebration"
- Location/Time/Context (ie. what is it?):
  - Barcelona 2006, Late Night, Barca Wins Champions Trophy Celebration

What was the goal?

- What were you trying to capture?
  - Capture the excitement at night of the fans, with colors
- Did you succeed?
  - You bet!
- Did you do anything special ?
  - Yes, played around with loads of effects to get the final look

Discuss the shot

- Did you plan the shot? Tell us about it?
  - *This is street photography, so there is a bit of luck involved!*
- How many pictures of the same scene did you take? Why did you choose to share this one?
  - *About 10. This one has the best view of the guy in the middle lit by the flame*
- Did you do any post-processing? (ie. used some computer app to improve the picture?)
  - Loads, to change the colors, and to enhance the contrast. Also did vignetting and framing

What else can be done?

- What else would you have done to make this picture better?
  - *I dunno, I think it is pretty good. Some more resolution would be good!*
- Do you wish there was some computational photography process that you can use to make it better (or worse?).
  - *A Cinemagraph at this level would have been awesome*
-

Any other details.

- Feel free to share other thoughts associated with this picture.
